Sales restrictions

When issuing and redeeming units of the sub-funds abroad, the provisions valid in the country in question shall apply.

Units of this umbrella fund may not be offered, sold or delivered within the United States.

Investors who are US persons must not be offered, sold or supplied with any units of this umbrella fund. A US person is someone who:

- (i) is a United States person within the meaning of paragraph 7701(a)(30) of the US Internal Revenue Code of 1986 (as amended) and the Treasury Regulations enacted in the Code;
- (ii) is a US person within the meaning of regulation S in the US Securities Act of 1933 (17 CFR § 230.902(k));
- (iii) is not a non-US person within the meaning of rule 4.7 of the US Commodity Futures Trading Commission Regulations (17 CFR § 4.7(a)(1)(iv));
- (iv) resides in the United States of America within the meaning of rule 202(a)(30)-1 of the US Investment Advisers Act of 1940 (as amended); or
- (v) is a trust, a legal entity or another structure founded for the purpose of enabling US persons to invest in this umbrella fund.

The fund management company and custodian bank may prohibit or restrict the sale, distribution or transfer of units to individuals or legal entities in certain countries or areas.

Supplementary information

Derivative financial instruments

Risk assessment process Commitment approach II:
Art. 35ff CISO-FINMA

Position	amount in CHF	In % of the fund's net asset
Gross overall exposure to derivatives	576 916 763.40	0.38%
Net overall exposure to derivatives	517 189 858.34	0.34%
Commitment arising from securities lending and repurchase agreements	–	–

Securities repurchase agreements

The sub-fund does not enter into any securities repurchase agreements.

Remuneration of the Fund Management

Flat fee

- Actual flat fee:
Class U: 1.30% p.a.;
 - Maximum flat fee as specified in the fund contract:
Class U: 2.16% p.a.;
- based on the average net fund assets.

The management fee charged by the target funds in which sub-fund assets are invested may not exceed 2.16% p.a., factoring in any retrocessions and discounts which may be due.

Commission sharing agreements and soft commissions

The fund management company has not concluded commission sharing agreements. The fund management company has not concluded agreements in respect of soft commissions.

The fund management company may envisage commission sharing agreements for target funds of UBS (CH) Vitainvest.

Total Expense Ratio (TER)

This ratio was calculated in accordance with the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of Collective Investment Schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

Composed TER for the last 12 months:

Class U: 1.37%*

* The target funds UBS (IRL) ETF PLC - UBS MSCI JAPAN UNIVERSAL UCITS ETF - JPY ACC, UBS SOLACTIVE US LISTED GOLD & SILVER MINERS UCITS ETF and UBS (CH) MANAGER SELECTION FUND - EQUITIES GLOBAL XT3 I-X do not publish a TER according to industry standards. The part of composed TER is calculated in accordance with the current version of the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes".

Issue and redemption price

If, on any one order day, the sum of subscriptions and redemptions of units in a sub-fund results in a net inflow or outflow, the sub-fund's valuation net asset value will be increased or reduced accordingly (swinging single pricing). The maximum valuation adjustment is basically 2% of the net asset value. However, in the event of exceptional circumstances, the fund management company may decide to temporarily apply an adjustment by more than 2% of the prevailing net asset value for every sub-fund and/or valuation day, if it sufficiently substantiates that the adjustment is justified in view of prevailing market conditions and in the best interests of investors. A temporary adjustment will be calculated in accordance with the procedure set out by the fund management company. Existing and new investors will be informed of the sufficiently substantiated decision on the application of this temporary measure and of its expiry by announcement in the umbrella fund's official medium of publication. The supervisory authority will also be notified. A modified valuation net asset value covers the incidental costs (bid-offer spreads, standard market brokerage fees, fees, levies etc) which arise on average from the investment of the part of the net inflow or sale of the part of the assets corresponding to the net outflow. The adjustment will result in an increase of the valuation net asset value if net movements result in an increase in the number of units in the sub-fund. Conversely, the adjustment results in a reduction of the valuation net asset value if net movements lead to a reduction in the number of units. The valuation net asset value calculated on the basis of swinging single pricing is thus a modified valuation net asset value.

Valuation of the sub-fund's assets and calculation of the net asset value

See appendix to supplementary information.

Supplementary information

Derivative financial instruments

Risk assessment process Commitment approach II:
Art. 35ff CISO-FINMA

Position	amount in CHF	In % of the fund's net asset
Gross overall exposure to derivatives	1 739 843 057.93	0.40%
Net overall exposure to derivatives	1 511 946 143.08	0.35%
Commitment arising from securities lending and repurchase agreements	–	–

Securities repurchase agreements

The sub-fund does not enter into any securities repurchase agreements.

Remuneration of the Fund Management

Flat fee

- Actual flat fee:
Class U: 1.50% p.a.;
- Maximum flat fee as specified in the fund contract:
Class U: 2.16% p.a.;
based on the average net fund assets.

The management fee charged by the target funds in which sub-fund assets are invested may not exceed 2.16% p.a., factoring in any retrocessions and discounts which may be due.

Commission sharing agreements and soft commissions

The fund management company has not concluded commission sharing agreements. The fund management company has not concluded agreements in respect of soft commissions.

The fund management company may envisage commission sharing agreements for target funds of UBS (CH) Vitainvest.

Total Expense Ratio (TER)

This ratio was calculated in accordance with the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of Collective Investment Schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

Composed TER for the last 12 months:

Class U: 1.57%*

* The target funds UBS (IRL) ETF PLC - UBS MSCI JAPAN UNIVERSAL UCITS ETF - JPY ACC, UBS SOLACTIVE US LISTED GOLD & SILVER MINERS UCITS ETF, UBS (CH) MANAGER SELECTION FUND - EQUITIES GLOBAL XT3 I-X, UBS (CH) MANAGER SELECTION FUND - EQUITIES SWITZERLAND XT 3 U-X and UBS (LUX) EQUITY FUND - EMERGING MARKETS SUSTAINABLE LEADERS (USD) (CHF) U-X-ACC do not publish a TER according to industry standards. The part of composed TER is calculated in accordance with the current version of the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes".

Issue and redemption price

If, on any one order day, the sum of subscriptions and redemptions of units in a sub-fund results in a net inflow or outflow, the sub-fund's valuation net asset value will be increased or reduced accordingly (swinging single pricing). The maximum valuation adjustment is basically 2% of the net asset value. However, in the event of exceptional circumstances, the fund management company may decide to temporarily apply an adjustment by more than 2% of the prevailing net asset value for every sub-fund and/or valuation day, if it sufficiently substantiates that the adjustment is justified in view of prevailing market conditions and in the best interests of investors. A temporary adjustment will be calculated in accordance with the procedure set out by the fund management company. Existing and new investors will be informed of the sufficiently substantiated decision on the application of this temporary measure and of its expiry by announcement in the umbrella fund's official medium of publication. The supervisory authority will also be notified. A modified valuation net asset value covers the incidental costs (bid-offer spreads, standard market brokerage fees, fees, levies etc) which arise on average from the investment of the part of the net inflow or sale of the part of the assets corresponding to the net outflow. The adjustment will result in an increase of the valuation net asset value if net movements result in an increase in the number of units in the sub-fund. Conversely, the adjustment results in a reduction of the valuation net asset value if net movements lead to a reduction in the number of units. The valuation net asset value calculated on the basis of swinging single pricing is thus a modified valuation net asset value.

Valuation of the sub-fund's assets and calculation of the net asset value

See appendix to supplementary information.

Supplementary information

Derivative financial instruments

Risk assessment process Commitment approach II:
Art. 35ff CISO-FINMA

Position	amount in CHF	In % of the fund's net asset
Gross overall exposure to derivatives	552 272 075.52	0.45%
Net overall exposure to derivatives	465 032 006.00	0.38%
Commitment arising from securities lending and repurchase agreements	–	–

Securities repurchase agreements

The sub-fund does not enter into any securities repurchase agreements.

Remuneration of the Fund Management

Flat fee

- Actual flat fee:
Class U: 1.60% p.a.;
 - Maximum flat fee as specified in the fund contract:
Class U: 2.16% p.a.;
- based on the average net fund assets.

The management fee charged by the target funds in which sub-fund assets are invested may not exceed 2.16% p.a., factoring in any retrocessions and discounts which may be due.

Commission sharing agreements and soft commissions

The fund management company has not concluded commission sharing agreements. The fund management company has not concluded agreements in respect of soft commissions.

The fund management company may envisage commission sharing agreements for target funds of UBS (CH) Vitainvest.

Total Expense Ratio (TER)

This ratio was calculated in accordance with the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of Collective Investment Schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

Composed TER for the last 12 months:

Class U: 1.67%*

* The target funds UBS (IRL) ETF PLC - UBS MSCI JAPAN UNIVERSAL UCITS ETF - JPY ACC, UBS SOLACTIVE US LISTED GOLD & SILVER MINERS UCITS ETF, UBS (CH) MANAGER SELECTION FUND - EQUITIES GLOBAL XT3 I-X, UBS (LUX) EQUITY FUND - EMERGING MARKETS SUSTAINABLE LEADERS (USD) (CHF) U-XACC and UBS (CH) MANAGER SELECTION FUND - EQUITIES SWITZERLAND XT 3 U-X do not publish a TER according to industry standards. The part of composed TER is calculated in accordance with the current version of the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes".

Issue and redemption price

If, on any one order day, the sum of subscriptions and redemptions of units in a sub-fund results in a net inflow or outflow, the sub-fund's valuation net asset value will be increased or reduced accordingly (swinging single pricing). The maximum valuation adjustment is basically 2% of the net asset value. However, in the event of exceptional circumstances, the fund management company may decide to temporarily apply an adjustment by more than 2% of the prevailing net asset value for every sub-fund and/or valuation day, if it sufficiently substantiates that the adjustment is justified in view of prevailing market conditions and in the best interests of investors. A temporary adjustment will be calculated in accordance with the procedure set out by the fund management company. Existing and new investors will be informed of the sufficiently substantiated decision on the application of this temporary measure and of its expiry by announcement in the umbrella fund's official medium of publication. The supervisory authority will also be notified. A modified valuation net asset value covers the incidental costs (bid-offer spreads, standard market brokerage fees, fees, levies etc) which arise on average from the investment of the part of the net inflow or sale of the part of the assets corresponding to the net outflow. The adjustment will result in an increase of the valuation net asset value if net movements result in an increase in the number of units in the sub-fund. Conversely, the adjustment results in a reduction of the valuation net asset value if net movements lead to a reduction in the number of units. The valuation net asset value calculated on the basis of swinging single pricing is thus a modified valuation net asset value.

Valuation of the sub-fund's assets and calculation of the net asset value

See appendix to supplementary information.

Supplementary information

Derivative financial instruments

Risk assessment process Commitment approach II:
Art. 35ff CISO-FINMA

Position	amount in CHF	In % of the fund's net asset
Gross overall exposure to derivatives	738 852 683.95	0.57%
Net overall exposure to derivatives	594 046 570.32	0.46%
Commitment arising from securities lending and repurchase agreements	–	–

Securities repurchase agreements

The sub-fund does not enter into any securities repurchase agreements.

Remuneration of the Fund Management

Flat fee

- Actual flat fee:
Class U: 1.60% p.a.;
 - Maximum flat fee as specified in the fund contract:
Class U: 2.16% p.a.;
- based on the average net fund assets.

The management fee charged by the target funds in which sub-fund assets are invested may not exceed 2.16% p.a., factoring in any retrocessions and discounts which may be due.

Commission sharing agreements and soft commissions

The fund management company has not concluded commission sharing agreements. The fund management company has not concluded agreements in respect of soft commissions.

The fund management company may envisage commission sharing agreements for target funds of UBS (CH) Vitainvest.

Total Expense Ratio (TER)

This ratio was calculated in accordance with the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of Collective Investment Schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

Composed TER for the last 12 months:

Class U: 1.61%*

* The target funds UBS (IRL) ETF PLC - UBS MSCI JAPAN UNIVERSAL UCITS ETF - JPY ACC, UBS SOLACTIVE US LISTED GOLD & SILVER MINERS UCITS ETF and UBS (CH) MANAGER SELECTION FUND - EQUITIES GLOBAL XT3 I-X do not publish a TER according to industry standards. The part of composed TER is calculated in accordance with the current version of the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes".

Issue and redemption price

If, on any one order day, the sum of subscriptions and redemptions of units in a sub-fund results in a net inflow or outflow, the sub-fund's valuation net asset value will be increased or reduced accordingly (swinging single pricing). The maximum valuation adjustment is basically 2% of the net asset value. However, in the event of exceptional circumstances, the fund management company may decide to temporarily apply an adjustment by more than 2% of the prevailing net asset value for every sub-fund and/or valuation day, if it sufficiently substantiates that the adjustment is justified in view of prevailing market conditions and in the best interests of investors. A temporary adjustment will be calculated in accordance with the procedure set out by the fund management company. Existing and new investors will be informed of the sufficiently substantiated decision on the application of this temporary measure and of its expiry by announcement in the umbrella fund's official medium of publication. The supervisory authority will also be notified. A modified valuation net asset value covers the incidental costs (bid-offer spreads, standard market brokerage fees, fees, levies etc) which arise on average from the investment of the part of the net inflow or sale of the part of the assets corresponding to the net outflow. The adjustment will result in an increase of the valuation net asset value if net movements result in an increase in the number of units in the sub-fund. Conversely, the adjustment results in a reduction of the valuation net asset value if net movements lead to a reduction in the number of units. The valuation net asset value calculated on the basis of swinging single pricing is thus a modified valuation net asset value.

Valuation of the sub-fund's assets and calculation of the net asset value

See appendix to supplementary information.

Supplementary information

Derivative financial instruments

Risk assessment process Commitment approach II:
Art. 35ff CISO-FINMA

Position	amount in CHF	In % of the fund's net asset
Gross overall exposure to derivatives	125 518 927.06	0.17%
Net overall exposure to derivatives	90 268 793.96	0.12%
Commitment arising from securities lending and repurchase agreements	–	–

Securities repurchase agreements

The sub-fund does not enter into any securities repurchase agreements.

Remuneration of the Fund Management

Flat fee

- Actual flat fee:
Class U: 1.25% p.a.;
 - Maximum flat fee as specified in the fund contract:
Class U: 2.16% p.a.;
- based on the average net fund assets.

The management fee charged by the target funds in which sub-fund assets are invested may not exceed 2.16% p.a., factoring in any retrocessions and discounts which may be due.

Commission sharing agreements and soft commissions

The fund management company has not concluded commission sharing agreements. The fund management company has not concluded agreements in respect of soft commissions.

The fund management company may envisage commission sharing agreements for target funds of UBS (CH) Vitainvest.

Total Expense Ratio (TER)

This ratio was calculated in accordance with the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of Collective Investment Schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

Composed TER for the last 12 months:

Class U: 1.34%*

* The target funds UBS (IRL) ETF PLC - UBS MSCI JAPAN UNIVERSAL UCITS ETF - JPY ACC, UBS SOLACTIVE US LISTED GOLD & SILVER MINERS UCITS ETF and UBS (CH) MANAGER SELECTION FUND - EQUITIES GLOBAL XT3 I-X do not publish a TER according to industry standards. The part of composed TER is calculated in accordance with the current version of the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes".

Issue and redemption price

If, on any one order day, the sum of subscriptions and redemptions of units in a sub-fund results in a net inflow or outflow, the sub-fund's valuation net asset value will be increased or reduced accordingly (swinging single pricing). The maximum valuation adjustment is basically 2% of the net asset value. However, in the event of exceptional circumstances, the fund management company may decide to temporarily apply an adjustment by more than 2% of the prevailing net asset value for every sub-fund and/or valuation day, if it sufficiently substantiates that the adjustment is justified in view of prevailing market conditions and in the best interests of investors. A temporary adjustment will be calculated in accordance with the procedure set out by the fund management company. Existing and new investors will be informed of the sufficiently substantiated decision on the application of this temporary measure and of its expiry by announcement in the umbrella fund's official medium of publication. The supervisory authority will also be notified. A modified valuation net asset value covers the incidental costs (bid-offer spreads, standard market brokerage fees, fees, levies etc) which arise on average from the investment of the part of the net inflow or sale of the part of the assets corresponding to the net outflow. The adjustment will result in an increase of the valuation net asset value if net movements result in an increase in the number of units in the sub-fund. Conversely, the adjustment results in a reduction of the valuation net asset value if net movements lead to a reduction in the number of units. The valuation net asset value calculated on the basis of swinging single pricing is thus a modified valuation net asset value.

Valuation of the sub-fund's assets and calculation of the net asset value

See appendix to supplementary information.

Supplementary information

Derivative financial instruments

Risk assessment process Commitment approach II:
Art. 35ff CISO-FINMA

Position	amount in CHF	In % of the fund's net asset
Gross overall exposure to derivatives	334 497 890.81	0.21%
Net overall exposure to derivatives	257 385 887.43	0.16%
Commitment arising from securities lending and repurchase agreements	–	–

Securities repurchase agreements

The sub-fund does not enter into any securities repurchase agreements.

Remuneration of the Fund Management

Flat fee

- Actual flat fee:
Class U: 1.40% p.a.;
 - Maximum flat fee as specified in the fund contract:
Class U: 2.16% p.a.;
- based on the average net fund assets.

The management fee charged by the target funds in which sub-fund assets are invested may not exceed 2.16% p.a., factoring in any retrocessions and discounts which may be due.

Commission sharing agreements and soft commissions

The fund management company has not concluded commission sharing agreements. The fund management company has not concluded agreements in respect of soft commissions.

The fund management company may envisage commission sharing agreements for target funds of UBS (CH) Vitainvest.

Total Expense Ratio (TER)

This ratio was calculated in accordance with the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of Collective Investment Schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

Composed TER for the last 12 months:

Class U: 1.49%*

* The target funds UBS (IRL) ETF PLC - UBS MSCI JAPAN UNIVERSAL UCITS ETF - JPY ACC, UBS SOLACTIVE US LISTED GOLD & SILVER MINERS UCITS ETF and UBS (CH) MANAGER SELECTION FUND - EQUITIES GLOBAL XT3 I-X do not publish a TER according to industry standards. The part of composed TER is calculated in accordance with the current version of the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes".

Issue and redemption price

If, on any one order day, the sum of subscriptions and redemptions of units in a sub-fund results in a net inflow or outflow, the sub-fund's valuation net asset value will be increased or reduced accordingly (swinging single pricing). The maximum valuation adjustment is basically 2% of the net asset value. However, in the event of exceptional circumstances, the fund management company may decide to temporarily apply an adjustment by more than 2% of the prevailing net asset value for every sub-fund and/or valuation day, if it sufficiently substantiates that the adjustment is justified in view of prevailing market conditions and in the best interests of investors. A temporary adjustment will be calculated in accordance with the procedure set out by the fund management company. Existing and new investors will be informed of the sufficiently substantiated decision on the application of this temporary measure and of its expiry by announcement in the umbrella fund's official medium of publication. The supervisory authority will also be notified. A modified valuation net asset value covers the incidental costs (bid-offer spreads, standard market brokerage fees, fees, levies etc) which arise on average from the investment of the part of the net inflow or sale of the part of the assets corresponding to the net outflow. The adjustment will result in an increase of the valuation net asset value if net movements result in an increase in the number of units in the sub-fund. Conversely, the adjustment results in a reduction of the valuation net asset value if net movements lead to a reduction in the number of units. The valuation net asset value calculated on the basis of swinging single pricing is thus a modified valuation net asset value.

Valuation of the sub-fund's assets and calculation of the net asset value

See appendix to supplementary information.

Supplementary information

Derivative financial instruments

Risk assessment process Commitment approach II:
Art. 35ff CISO-FINMA

Position	amount in CHF	In % of the fund's net asset
Gross overall exposure to derivatives	154 223 850.16	0.22%
Net overall exposure to derivatives	113 503 128.09	0.16%
Commitment arising from securities lending and repurchase agreements	–	–

Securities repurchase agreements

The sub-fund does not enter into any securities repurchase agreements.

Remuneration of the Fund Management

Flat fee

- Actual flat fee:
Class U: 1.50% p.a.;
 - Maximum flat fee as specified in the fund contract:
Class U: 2.16% p.a.;
- based on the average net fund assets.

The management fee charged by the target funds in which sub-fund assets are invested may not exceed 2.16% p.a., factoring in any retrocessions and discounts which may be due.

Commission sharing agreements and soft commissions

The fund management company has not concluded commission sharing agreements. The fund management company has not concluded agreements in respect of soft commissions.

The fund management company may envisage commission sharing agreements for target funds of UBS (CH) Vitainvest.

Total Expense Ratio (TER)

This ratio was calculated in accordance with the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of Collective Investment Schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

Composed TER for the last 12 months:

Class U: 1.59%*

* The target funds UBS (IRL) ETF PLC - UBS MSCI JAPAN UNIVERSAL UCITS ETF - JPY ACC, UBS SOLACTIVE US LISTED GOLD & SILVER MINERS UCITS ETF and UBS (CH) MANAGER SELECTION FUND - EQUITIES GLOBAL XT3 I-X do not publish a TER according to industry standards. The part of composed TER is calculated in accordance with the current version of the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes".

Issue and redemption price

If, on any one order day, the sum of subscriptions and redemptions of units in a sub-fund results in a net inflow or outflow, the sub-fund's valuation net asset value will be increased or reduced accordingly (swinging single pricing). The maximum valuation adjustment is basically 2% of the net asset value. However, in the event of exceptional circumstances, the fund management company may decide to temporarily apply an adjustment by more than 2% of the prevailing net asset value for every sub-fund and/or valuation day, if it sufficiently substantiates that the adjustment is justified in view of prevailing market conditions and in the best interests of investors. A temporary adjustment will be calculated in accordance with the procedure set out by the fund management company. Existing and new investors will be informed of the sufficiently substantiated decision on the application of this temporary measure and of its expiry by announcement in the umbrella fund's official medium of publication. The supervisory authority will also be notified. A modified valuation net asset value covers the incidental costs (bid-offer spreads, standard market brokerage fees, fees, levies etc) which arise on average from the investment of the part of the net inflow or sale of the part of the assets corresponding to the net outflow. The adjustment will result in an increase of the valuation net asset value if net movements result in an increase in the number of units in the sub-fund. Conversely, the adjustment results in a reduction of the valuation net asset value if net movements lead to a reduction in the number of units. The valuation net asset value calculated on the basis of swinging single pricing is thus a modified valuation net asset value.

Valuation of the sub-fund's assets and calculation of the net asset value

See appendix to supplementary information.

Supplementary information

Derivative financial instruments

Risk assessment process Commitment approach II:
Art. 35ff CISO-FINMA

There were no contracts in derivative financial instruments open at balance sheet date.

Securities repurchase agreements

The sub-fund does not enter into any securities repurchase agreements.

Remuneration of the Fund Management

Flat fee

- Actual flat fee:
 - Class Q: 0.19% p.a.;
 - Class by UBS key4: 0.19% p.a.;
 - Maximum flat fee as specified in the fund contract:
 - Class Q: 1.30% p.a.;
 - Class by UBS key4: 1.30% p.a.;
- based on the average net fund assets.

The management fee charged by the target funds in which sub-fund assets are invested may not exceed 2.16% p.a., factoring in any retrocessions and discounts which may be due.

Commission sharing agreements and soft commissions

The fund management company has not concluded commission sharing agreements. The fund management company has not concluded agreements in respect of soft commissions.

The fund management company may envisage commission sharing agreements for target funds of UBS (CH) Vitainvest.

Total Expense Ratio (TER)

This ratio was calculated in accordance with the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of Collective Investment Schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

Composed TER for the last 12 months:
Class Q: 0.27%
Class by UBS key4: 0.27%

Issue and redemption price

If, on any one order day, the sum of subscriptions and redemptions of units in a sub-fund results in a net inflow or outflow, the sub-fund's valuation net asset value will be increased or reduced accordingly (swinging single pricing). The maximum valuation adjustment is basically 2% of the net asset value. However, in the event of exceptional circumstances, the fund management company may decide to temporarily apply an adjustment by more than 2% of the prevailing net asset value for every sub-fund and/or valuation day, if it sufficiently substantiates that the adjustment is justified in view of prevailing market conditions and in the best interests of investors. A temporary adjustment will be calculated in accordance with the procedure set out by the fund management company. Existing and new investors will be informed of the sufficiently substantiated decision on the application of this temporary measure and of its expiry by announcement in the umbrella fund's official medium of publication. The supervisory authority will also be notified. A modified valuation net asset value covers the incidental costs (bid-offer spreads, standard market brokerage fees, fees, levies etc) which arise on average from the investment of the part of the net inflow or sale of the part of the assets corresponding to the net outflow. The adjustment will result in an increase of the valuation net asset value if net movements result in an increase in the number of units in the sub-fund. Conversely, the adjustment results in a reduction of the valuation net asset value if net movements lead to a reduction in the number of units. The valuation net asset value calculated on the basis of swinging single pricing is thus a modified valuation net asset value.

Valuation of the sub-fund's assets and calculation of the net asset value

See appendix to supplementary information.

Supplementary information

Derivative financial instruments

Risk assessment process Commitment approach II:
Art. 35ff CISO-FINMA

There were no contracts in derivative financial instruments open at balance sheet date.

Securities repurchase agreements

The sub-fund does not enter into any securities repurchase agreements.

Remuneration of the Fund Management

Flat fee

- Actual flat fee:
 - Class Q: 0.19% p.a.;
 - Class by UBS key4: 0.19% p.a.;
 - Maximum flat fee as specified in the fund contract:
 - Class Q: 1.30% p.a.;
 - Class by UBS key4: 1.30% p.a.;
- based on the average net fund assets.

The management fee charged by the target funds in which sub-fund assets are invested may not exceed 2.16% p.a., factoring in any retrocessions and discounts which may be due.

Commission sharing agreements and soft commissions

The fund management company has not concluded commission sharing agreements. The fund management company has not concluded agreements in respect of soft commissions.

The fund management company may envisage commission sharing agreements for target funds of UBS (CH) Vitainvest.

Total Expense Ratio (TER)

This ratio was calculated in accordance with the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of Collective Investment Schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

Composed TER for the last 12 months:

- Class Q: 0.24%
- Class by UBS key4: 0.24%

Issue and redemption price

If, on any one order day, the sum of subscriptions and redemptions of units in a sub-fund results in a net inflow or outflow, the sub-fund's valuation net asset value will be increased or reduced accordingly (swinging single pricing). The maximum valuation adjustment is basically 2% of the net asset value. However, in the event of exceptional circumstances, the fund management company may decide to temporarily apply an adjustment by more than 2% of the prevailing net asset value for every sub-fund and/or valuation day, if it sufficiently substantiates that the adjustment is justified in view of prevailing market conditions and in the best interests of investors. A temporary adjustment will be calculated in accordance with the procedure set out by the fund management company. Existing and new investors will be informed of the sufficiently substantiated decision on the application of this temporary measure and of its expiry by announcement in the umbrella fund's official medium of publication. The supervisory authority will also be notified. A modified valuation net asset value covers the incidental costs (bid-offer spreads, standard market brokerage fees, fees, levies etc) which arise on average from the investment of the part of the net inflow or sale of the part of the assets corresponding to the net outflow. The adjustment will result in an increase of the valuation net asset value if net movements result in an increase in the number of units in the sub-fund. Conversely, the adjustment results in a reduction of the valuation net asset value if net movements lead to a reduction in the number of units. The valuation net asset value calculated on the basis of swinging single pricing is thus a modified valuation net asset value.

Valuation of the sub-fund's assets and calculation of the net asset value

See appendix to supplementary information.

Supplementary information

Derivative financial instruments

Risk assessment process Commitment approach II:
Art. 35ff CISO-FINMA

There were no contracts in derivative financial instruments open at balance sheet date.

Securities repurchase agreements

The sub-fund does not enter into any securities repurchase agreements.

Remuneration of the Fund Management

Flat fee

- Actual flat fee:
 - Class Q: 0.19% p.a.;
 - Class by UBS key4: 0.19% p.a.;
 - Maximum flat fee as specified in the fund contract:
 - Class Q: 1.30% p.a.;
 - Class by UBS key4: 1.30% p.a.;
- based on the average net fund assets.

The management fee charged by the target funds in which sub-fund assets are invested may not exceed 2.16% p.a., factoring in any retrocessions and discounts which may be due.

Commission sharing agreements and soft commissions

The fund management company has not concluded commission sharing agreements. The fund management company has not concluded agreements in respect of soft commissions.

The fund management company may envisage commission sharing agreements for target funds of UBS (CH) Vitainvest.

Total Expense Ratio (TER)

This ratio was calculated in accordance with the AMAS "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of Collective Investment Schemes" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

Composed TER for the last 12 months:	
Class Q:	0.24%
Class by UBS key4:	0.24%

Issue and redemption price

If, on any one order day, the sum of subscriptions and redemptions of units in a sub-fund results in a net inflow or outflow, the sub-fund's valuation net asset value will be increased or reduced accordingly (swinging single pricing). The maximum valuation adjustment is basically 2% of the net asset value. However, in the event of exceptional circumstances, the fund management company may decide to temporarily apply an adjustment by more than 2% of the prevailing net asset value for every sub-fund and/or valuation day, if it sufficiently substantiates that the adjustment is justified in view of prevailing market conditions and in the best interests of investors. A temporary adjustment will be calculated in accordance with the procedure set out by the fund management company. Existing and new investors will be informed of the sufficiently substantiated decision on the application of this temporary measure and of its expiry by announcement in the umbrella fund's official medium of publication. The supervisory authority will also be notified. A modified valuation net asset value covers the incidental costs (bid-offer spreads, standard market brokerage fees, fees, levies etc) which arise on average from the investment of the part of the net inflow or sale of the part of the assets corresponding to the net outflow. The adjustment will result in an increase of the valuation net asset value if net movements result in an increase in the number of units in the sub-fund. Conversely, the adjustment results in a reduction of the valuation net asset value if net movements lead to a reduction in the number of units. The valuation net asset value calculated on the basis of swinging single pricing is thus a modified valuation net asset value.

Valuation of the sub-fund's assets and calculation of the net asset value

Class by UBS key4:	0.23%

Issue and redemption price

If, on any one order day, the sum of subscriptions and redemptions of units in a sub-fund results in a net inflow or outflow, the sub-fund's valuation net asset value will be increased or reduced accordingly (swinging single pricing). The maximum valuation adjustment is basically 2% of the net asset value. However, in the event of exceptional circumstances, the fund management company may decide to temporarily apply an adjustment by more than 2% of the prevailing net asset value for every sub-fund and/or valuation day, if it sufficiently substantiates that the adjustment is justified in view of prevailing market conditions and in the best interests of investors. A temporary adjustment will be calculated in accordance with the procedure set out by the fund management company. Existing and new investors will be informed of the sufficiently substantiated decision on the application of this temporary measure and of its expiry by announcement in the umbrella fund's official medium of publication. The supervisory authority will also be notified. A modified valuation net asset value covers the incidental costs (bid-offer spreads, standard market brokerage fees, fees, levies etc) which arise on average from the investment of the part of the net inflow or sale of the part of the assets corresponding to the net outflow. The adjustment will result in an increase of the valuation net asset value if net movements result in an increase in the number of units in the sub-fund. Conversely, the adjustment results in a reduction of the valuation net asset value if net movements lead to a reduction in the number of units. The valuation net asset value calculated on the basis of swinging single pricing is thus a modified valuation net asset value.

Valuation of the sub-fund's assets and calculation of the net asset value

See appendix to supplementary information.

Appendix to Supplementary information

Valuation of the sub-fund's assets and calculation of the net asset value

Valuation of the fund's assets

1. Each sub-fund's net asset value and the proportions of the individual classes (percentages) shall be calculated in the currency units of the respective sub-fund at market value as of the close of the financial year and for each day on which units are issued or redeemed (valuation net asset value). The individual sub-funds' assets are not calculated on days when the stock exchanges or markets in the sub-fund's main investment countries are closed (e.g. bank and stock exchange holidays).
However, on days on which no units are issued or redeemed, the fund management company may calculate the net asset value per unit ("non-tradable net asset value"), e.g. if the last calendar day of a month falls on a day specified in prov. 5.2 of the appendix to the prospectus. Such non-negotiable net asset values may be published. However, they may be used only for performance calculations and performance statistics (in particular to compare against the benchmark) or for commission calculations, and must under no circumstances be used as the basis for subscription and redemption orders.
2. Investments listed on a stock exchange or traded on another regulated market open to the public shall be valued at the current prices paid on the main market. Other investments or investments for which no current market price is available are valued at the price likely to be obtained if a sale were conducted with proper care at the time of the valuation. In such cases the fund management company shall use appropriate and recognised valuation models and principles to determine the market value.
3. Open-end collective investments are valued using their redemption price or net asset value. If they are listed on a stock exchange or regularly traded on another regulated market open to the public, the fund management company may value them pursuant to prov. 2.
4. The value of money market instruments which are not listed on a stock exchange or traded on another regulated market open to the public is calculated as follows: the valuation price of such investments is based on the respective interest rate curve. The valuation based on the interest rate curve comprises an interest rate component and a spread component. The following principles are applied: for each money market instrument, the closest rates of interest to the residual term shall be interpolated. The rate of interest thus established shall be converted into a market rate, adding a spread which reflects the creditworthiness of the underlying borrower. This spread is adjusted in the event of a significant change in the borrower's credit rating.
5. Bank deposits shall be valued using their exposure amount plus accrued interest. In the event of significant changes in market conditions or the credit rating, the valuation basis for bank deposits on demand shall be adjusted in line with the new conditions.
6. Derivative financial instruments listed on a stock exchange or traded on another regulated market open to the public are valued at the current prices paid on the

main market. Derivative financial instruments not listed on a stock exchange or traded on another regulated market open to the public (OTC derivatives) shall be valued at the price likely to be obtained if a sale were conducted with proper care at the time of the valuation. In such cases the fund management company shall use appropriate and recognized valuation models and principles to determine the market value.

7. The percentages of the market value of a sub-fund's net assets (sub-fund assets less liabilities) which are to be attributed to each unit class shall be determined for the first time upon the initial issue of multiple unit classes (if they are issued simultaneously) or the initial issue of an additional unit class, on the basis of the inflows to the sub-fund for each unit class. The percentage will be recalculated if one of the following events occurs:
 - a. upon the issue and redemption of units;
 - b. on the cut-off date for distributions provided (i) such distributions accrue only to individual unit classes (distribution classes) or provided (ii) the distributions of various unit classes as a percentage of the respective net asset value differ or provided (iii) different commission or cost charges accrue on the distributions of various unit classes as a percentage of distributions;
 - c. for the calculation of the net asset value, in terms of the allocation of liabilities (including costs and commissions which are due or have accrued) to the various unit classes, provided the liabilities of the various unit classes vary as percentages of their respective net asset values, namely if (i) different commission rates are applied for the different unit classes or if (ii) class-specific cost charges arise;
 - d. for the calculation of net asset value, in terms of the allocation of income or investment income to the various unit classes, provided the income or investment income accrues from transactions which were carried out in the interest of one unit class or in the interest of several unit classes, but not in proportion to their share of net assets of a sub-fund.

Calculation of the net asset value

The net asset value of a unit of a class represents the percentage constituted by the unit class concerned of the market value of the sub-fund assets, less all the liabilities of this sub-fund allocated to the respective unit class, divided by the number of units of the relevant class in circulation. This is rounded to 0.01 of a unit of the accounting currency of the individual sub-fund.

OTC-Derivatives

If the sub-fund enters into OTC transactions, it may be exposed to risks related to the creditworthiness of the OTC counterparties: when the sub-fund enters into futures contracts, options and swap transactions or uses other derivative techniques it is subject to the risk that an OTC counterparty may not meet (or cannot meet) its obligations under a specific or multiple contracts. Counterparty risk can be reduced by depositing a security. If the sub-fund is owed a security pursuant to an applicable agreement, such security shall be held in custody by the Custodian bank/Custodian in favour of the sub-fund. Bankruptcy and insolvency events or other credit events with the OTC counterparty, the Custodian Bank or within their subcustodian/correspondent bank network may result in the rights or recognition of the sub-fund in connection with the security to be delayed, restricted or even eliminated, which would force the sub-fund to fulfill its obligations in the framework of the OTC transaction, in spite of any security that had previously been made available to cover any such obligation.

Other Information

UBS (CH) Vitainvest – World 25 Sustainable

UBS (CH) Vitainvest – World 50 Sustainable

UBS (CH) Vitainvest – World 75 Sustainable

2025 was dominated by tariff cycles, a drift toward disinflation and a cooling yet resilient US labor picture. The year's inflection came in April (tariff shock, risk-off, dollar/Treasury tests), followed by May–June de escalation and geopolitical easing that restored risk appetite. Later, the Fed delivered two cuts (September and October), while the ECB maintained a data dependent stance after an extended easing run. Together, this produced a cautious policy support for assets without removing uncertainty.

In equities, after April's drawdown, earnings strength and AI capex drove new highs in the US, Europe benefited from fiscal/defense dynamics, Japan rallied on currency and policy expectations, while China's path reflected domestic softness and targeted policy themes.

Swiss equities have participated directionally in global risk on and risk off swings – tariff news was negative but not destructive overall – two thirds of Swiss firms' US sales are produced domestically, which is limiting import exposure. Earnings drivers remain intact: the SMI's profit growth is stable and valuation is fair to attractive, given low CHF rates – making dividend growth quality the preferred theme.

In fixed income, sovereign yields whipsawed – April saw disorderly long end moves, June stabilized on ceasefire and trade progress, and Q3–Q4 priced gradual easing. Credit spreads stayed historically tight on robust balance sheets and carry demand, despite episodic widening.

In Swiss real estate, prices rose faster than incomes and rents, user costs of ownership remained below renting on lower mortgage rates, mortgage growth accelerated modestly and construction activity stayed subdued.

The sub-fund posted a positive performance, after costs, in the financial year from 1 January 2025 to 31 December 2025. The highest contribution came from the exposure to world ex-Swiss equities. However, Swiss and emerging market equities as well as allocation in real estate also delivered solid results. Fixed income, specifically world ex-Swiss government bonds, was the only detractor in this fiscal year.

UBS (CH) Vitainvest – World 100 Sustainable

Equity markets navigated a year defined by policy volatility and AI-driven narratives. January opened with a sharp tech wobble after DeepSeek's launch rattled US AI leaders, briefly denting mega-cap momentum, even as US and European indices set fresh highs mid-month. The most acute stress came in April, when sweeping US tariff proposals triggered a risk-off wave. Volatility spiked, the S&P 500 fell double-digits in a week and investors questioned the dollar/Treasury safe haven dynamic before a policy tone-down restored calm.

From May–June, sentiment flipped: a US–China tariff de escalation and strong Q1 earnings propelled a broad rally, with the S&P 500 and global benchmarks reclaiming highs. AI remained a decisive leadership theme, but investor focus broadened across the supply chain. September reignited enthusiasm via blockbuster AI capex commitments (multi hundred billion cloud/data center announcements), coinciding with the Fed's first 2025 rate cut. Equities treated cautious easing as constructive for valuations and liquidity.

Swiss equities have participated directionally in global risk on and risk off swings. Tariff news was negative but not destructive overall – two thirds of Swiss firms' US sales are produced domestically, which is limiting import exposure. Earnings drivers remain intact: the SMI's profit growth is stable and valuation is fair to attractive given low CHF rates – making dividend growth quality the preferred theme.

Into October–November, US equities again set records despite mixed macro prints and shifting cut odds. Japan surged on yen weakness and policy expectations, while China's performance turned more idiosyncratic amid softer domestic data and policy recalibration. By year-end, breadth was still uneven but equity beta proved resilient. Tariff swings punctuated performance, earnings and AI investment anchored leadership, and incremental policy easing supported multiples without relieving all rate and growth uncertainties.

The sub-fund posted a positive performance, after costs, in the financial year from 1 January 2025 to 31 December 2025. The highest contribution came from the exposure to world ex-Swiss equities, although Swiss and emerging market equities also delivered solid results. There were no detractors.
